* High-quality "Lord of the Rings" Wallpapers * Customize the desktop wallpaper with a choice of layouts, transitions and delays * Available in High and Middle-High color depths. * Theme is natively compatible with Windows XP and Windows Vista. * Simple and intuitive interface * Customize the desktop wallpaper * Change the wallpaper at any time with a simple click * Supports all screen sizes * Theme can be displayed in full-screen mode * Save and reload changes on demand * Support for Windows XP and Windows Vista * Easy to use * FreeDownloadQ: JavaFX 8 FileChooser on Mac: Broken "Show In Finder" Menu option I'm testing a new javaFX 8 project on Mac OS X and am encountering a problem when opening an external file using a FileChooser. I can select the file using the "Open" menu item, but pressing the "Show In Finder" menu item does nothing. I've been able to reproduce this using the new javaFX openFileChooser() method to open files on my own system, as described in the javafx-docs, using the following code: public class Main extends Application { public static void main(String[] args) { launch(args); } @Override public void start(Stage stage) { FileChooser fc = new FileChooser(); fc.showOpenDialog(stage.getScene().getWindow()); } } If I try and save the image by right clicking on it, the FileChooser's popup menu also doesn't show the "Show In Finder" menu item. Is this a bug? It's easy to fix by adding showOpenDialog(new File("/"), FileChooser.DIRECTORIES_ONLY); to the start method above, but I'm trying to avoid using showOpenDialog() if I can. A: Found this in the bug tracker. This seems to be fixed in the latest version of JavaFX - I'm using 8u202. 'Nightly Stand-up Comics' 'Nightly Stand 81e310abff

Best Free Backgrounds Free Backgrounds 1.0 by DaMaison Software; Version: The Best Free Backgrounds Free Backgrounds 1.0 free software is designed to bring a fresh atmosphere to your Windows desktop. It includes 10 high-quality HD wallpaper images, with up to 1440 x 900px resolution. The backgrounds are completely free, no registration or installation is required. The program can be launched from the Windows Start Menu by clicking the Free Backgrounds Free Backgrounds 1.0 icon. All backgrounds are suitable for all screen sizes, including ultra-wide and portable computers. You can adjust image size and position using several options, such as fade effect, fit to screen, fit to page and random. You can also set the background to display for a specific period of time. You can assign an action to each image, for example an email alert, or launch any desktop application, or change the system clock with an onscreen clock. The program also includes a sound scheme which can be used as your background music. To make your computer environment even more pleasant, you can disable your program's notifications, adjust the notification sound and disable the program's tray icon. The interface of the software is quite intuitive, and no technical knowledge is required to use it. The Best Free Backgrounds Free Backgrounds 1.0 free software is also simple to install, you can use the drag & drop method to load the included images on your computer. The Best Free Backgrounds Free Backgrounds 1.0 free software includes an application wizard that takes you through the installation process, quickly and easily. When you are finished, you can launch it from the Start Menu. Best Free Backgrounds Free Backgrounds 1.0 free software is designed to be a really simple program, with very few options, but it has many useful features that make your Windows desktop look great. Download Now! Orbit - Utilities/Other Utilities... Orbit is an XML file manager for Windows. It allows you to easily browse, edit, and create XSLT (XML Stylesheet Language Transformations), XML, and HTML files from a GUI. Actually it is the 16th year of an economic recovery but some people, such as the President, still don't believe we are in a recovery. In fact he recently made a statement that the economy wasn't growing because it was a period of ♦
