Screenshots of Acer OEM 3 pack Increased lymphocyte endothelial adhesion molecule-1 (CD62L) expression in early-stage uveitis and inhibition of adhesion by anti-TNF-alpha therapy. Lymphocyte endothelial adhesion molecule-1 (CD62L) regulates lymphocyte homing to lymph nodes and Peyer's patches. Expression of this molecule is decreased on circulating lymphocytes in certain autoimmune diseases. In the present study, we investigated the expression of CD62L in ocularly involved lymphocytes from uveitis patients. We also examined whether anti-TNF-alpha therapy influences CD62L expression. Lymphocytes from the ocular draining lymph node (ODLN) of early-stage uveitis patients (chronic anterior uveitis and herpetic anterior uveitis) were examined by flow cytometry. Expression of CD62L on lymphocytes in ODLN and the peripheral blood of active rheumatoid arthritis patients was examined in comparison with expression on circulating lymphocytes in healthy volunteers. Expression of CD62L on lymphocytes in the ODLN of uveitis patients was also examined during uveitis exacerbation and during immunosuppression with anti-TNF-alpha therapy. Expression of CD62L on lymphocytes in the ODLN of uveitis patients was significantly decreased when compared with that on circulating lymphocytes in healthy volunteers. CD62L expression on lymphocytes in the ODLN of active rheumatoid arthritis patients was not significantly different from that on lymphocytes in the ODLN of uveitis patients. CD62L expression on lymphocytes in the peripheral blood of uveitis patients was also decreased when compared with that on lymphocytes in the peripheral blood of healthy volunteers. Anti-TNF-alpha therapy for uveitis was associated with an increase in CD62L expression on lymphocytes in the ODLN. Expression of CD62L on lymphocytes in the ODLN of uveitis patients was decreased when compared with that on lymphocytes in the peripheral blood. These findings indicate that the interaction between lymphocytes and the blood-retinal barrier may be altered in uveitis.using System; using System.Collections.Generic; using System.Linq;
